New website for DK Jones

DK JONES Piping Products has announced that its new website is now live. Full details are now available of the latest range of high quality materials and sizes available from stock together with printable catalogues, technical information, dimensions, tolerances, manufacturing standards and weights of forged fittings, weld outlet fittings, butt weld fittings, flanges, nipples and pipes.

Information on DK Jones' quality policy plus a copy of its up-to-date ISO 9001 quality certificate is also easily accessible on the site. Data regarding its in-house machining capabilities and testing is also available together with details of the new grades of bar and solid forgings now held in stock and available for immediate machining to standard or special sizes.

DK Jones is a UK-based stockist and distributor of high quality, fully certified, piping and associated products. It provides materials for clients in the oil, gas, power, chemical and petrochemical sectors worldwide.

Online engineering and technology library

In order to make its digital library more accessible to individuals, the Institution of Engineering and Technology (IET) has launched a new, flexible way to access the content. The collection of science, engineering and technology content, with over 190,000 technical documents, including journal articles, e-book chapters and conference publications, is now available to engineering practitioners.

Known as 'Knowledge Packs', users can purchase download credits in packs of ten, which can then be used to access engineering research content covering a specialist range of subject areas from electrical and electronic engineering to mechanical and production engineering.

The range includes journals such as *Electronics Letters*, 24 research journal titles covering specialist subject areas from control theory and applications to wireless sensor systems, *Engineering & Technology* magazine, seminar digests and conference publications.
